OUR BRANDS

CHROMEX

Professional quality of lights

A French brand of cables and garlands since 1943, Chromex is the specialist in lighting equipment for cities and professionals. The brand combines the professional and technological quality of its products with great ease of use. Its product lines combine aesthetic design with low energy consumption.

CHROMEX.FR

twinkly™ PRO

The Twinkly Pro experience

• Instant setup

Place your Twinkly Pro string lights and download the app. Easily connect your device to Wi-Fi.

• Scan our decoration

The app is able to detect the exact position of every single LED through your smartphone camera.

• Play with different effects

Choose from a huge gallery of effects that can be fully customized by adjusting the speed, colors, and other settings for each animation.

• Customize your animation

You can easily design your own effects: draw your creations with your finger or download additional effects.

OUR BRANDS

Today's decorations are the raw materials for tomorrow's designs.

Leblanc Illuminations has invested in a fleet of 3D printing robots and developed **e-deco**, a range of **durable daytime decorations** that **do not require electricity**.

With its **4 materials and 13 dynamic, festive colors**, e-deco offers limitless creative freedom in design.

Our printed products are **manufactured in our own factory**. The raw materials are **biosourced, recycled, and recyclable**: at the end of their lifecycle, they are ground into new granules that will be **used to create new decorations**.

SEASONAL FESTIVITIES

SEASIDE

PINK OCTOBER

SUMMER DECORATIONS

SEASONAL FESTIVITIES

1958

Founder of the lighting decorations market

Michel Leblanc created the Leblanc illuminations company in the Meuse region in France. He was the first to produce wooden decorations fitted with porcelain sockets

1960

FIRST ALUMINUM DECOR MANUFACTURER

Leblanc illuminations is the first player in its market to produce light decorations on an aluminum frame.

1982

FIRST TO ILLUMINATE THE CHAMPS-ÉLYSÉES

Leblanc illuminations is the first company to have illuminated the most beautiful avenue in the world.

1988

ROPE & ROLL

Rope light gradually replaces sockets in our light decorations.

1994

A ROYAL PLACE

Leblanc illuminations goes international with Gala Lights, our UK subsidiary.

1996

PIONEER OF LED

Leblanc illuminations anticipated the need for energy savings by being the first in Europe to include LED garlands in its illuminations.

2007

THE FAR NORTH IS OURS!

Leblanc illuminations Canada opens up and lets the Canadian snow shine.

2015

3D PRINTING

Leblanc Illuminations innovates by using 3D prototyping.

2014

CONTROL YOUR ELECTRICITY CONSUMPTION

Thanks to our set control solution, programming the times and operating period for you illuminations, zone by zone, is simple and quick, with just a few clicks on your smartphone.

2014

ISO 9001 CERTIFICATION

Leblanc illuminations is the first company in its sector to be ISO 9001 certified.

2013

¡ VIVA ILUMINACIÓN !

Creation of the Leblanc Mexico subsidiary starting by the illumination of the town of Puebla and the Mazatlán shopping centre.

2010

LEBLANC TOUCHES HOSPITALS HEART

Leblanc illuminations and "Les Blouses Roses" have teamed up to offer hospitalised children and elderly patients a Christmas full of light every year.

2008

FIRST TO USE VIDEO FOR CHRISTMAS LIGHTS

Leblanc illuminations reinvents Christmas illuminations with the first animated and personalized 3D decor using video technology.

LET'S GO EAST

The base of our main production facility is founded. Leblanc illuminations România is created.

2015

AUTHENTIC PARTNERSHIP

Leblanc illuminations highlights Megève, this small internationally renowned village of the Savoy Region in the French Alps, and becomes its official partner in 2017.

2016

FRENCH SKI FEDERATION PARTNERSHIP

Signed an official 4 year partnership with the French Ski Federation and the French Ski Freestyle team, renewed until 2028.

2016

VIRTUAL REALITY

Virtual Reality, Augmented Reality, 3D Scanning – Leblanc uses new technologies which serve your imagination.

2017

A SCENT OF SUCCESS

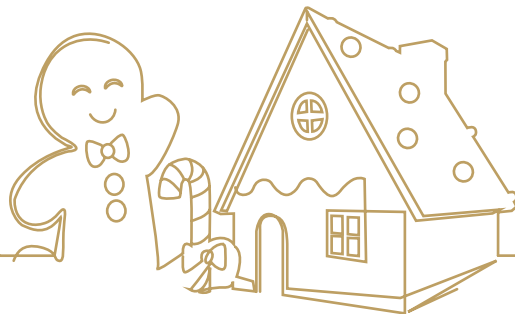

Leblanc illuminations combines light and fragrance for a unique experience.

2019

LET'S SAVE CHRISTMAS

Between reality and the virtual world, Leblanc illuminations puts the user at the heart of illuminations.

2023

A LEGENDARY CIRCUIT

Leblanc illuminations enjoyed breathtaking scenery and a grand celebration, as a partner at the 24 Hours of Le Mans race centenary.

2022

COQ VERT

To underline its commitment to ecological transition, Leblanc illuminations joined the Coq Vert Eco Community.

2021

GREEN REVOLUTION

This 3D printing process produces new and more sustainable daytime decorations.

2021

CSR 26000 CERTIFICATION

Leblanc illuminations becomes the most labelled company in its sector, with its CSR 26000 and ISO 9001 certifications.

2021

EXPERIENTIAL SHOW

Leblanc illuminations create a unique experiential light show: a new combination of architectural lighting, luminous decorations and lighting solutions.

2020

CONNECTED LIGHTS

Leblanc illuminations becomes a distributor of Twinkly Pro, a range of smartphone-controlled decors.

2024

HALTO

EXPANDS THE FAMILY

The preferred partner of lighting professionals deploys its expertise to create exceptional lighting.

2025

LEBLANC SETS THE SCENE

In partnership with the NGO WeForest, Leblanc illuminations offsets its CO₂ emissions by supporting reforestation and ecological restoration projects to fight climate change.

THE MOST CERTIFIED MANUFACTURER IN ITS SECTOR

ISO 9001 & CSR 26000

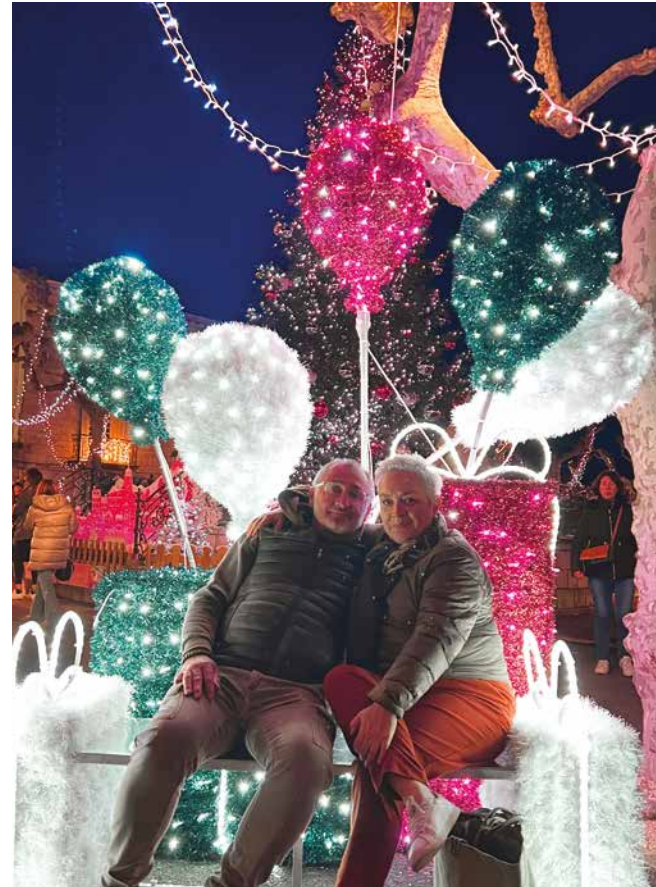

Aware of social and environmental issues, the entire Leblanc Illuminations team is more committed than ever to improving our products, reducing our environmental impact, and ensuring customer satisfaction.

This ongoing commitment is recognized through **ISO 9001 certification since 2014** and confirmed by the **CSR 26000 label, awarded in 2021 and renewed in 2023.**

In 2022, Leblanc Illuminations joined the Coq Vert community, initiated by BPI France, ADEME, and the Ministry of Ecological Transition, which brings together companies that prioritize climate challenges in their strategy. This is the result of long-term dedication from all our teams and investments in our production facilities.

We are the only French manufacturer that is:

- **ISO 9001 certified**
- **CSR 26000 certified**
- **A WeForest partner**
- **A member of the Coq Vert community**
- **Manufacturing in France & Europe without subcontracting**

We are proud to be the most certified company in our sector!

WITH WEFORREST, A STRONG COMMITMENT TO THE CLIMATE

From 2025, Leblanc illuminations is strengthening its commitments.

We are proud to announce our dedication to **the fight against climate change**. In partnership with the NGO WeForest, we offset our CO₂ emissions by supporting reforestation and conservation projects in Tanzania and Peru.

These initiatives have a multiple and lasting impact:

- **On nature:** by restoring ecosystems, increasing biodiversity, and enhancing forest resilience.
- **On local communities:** by creating economic opportunities, improving living conditions, and strengthening rural communities.
- **On the climate:** by absorbing atmospheric carbon and helping to limit global warming.

Our approach is part of a long-term vision — one that combines sustainable development with environmental responsibility to build a better future for all.

LIGHTING UP THE HEART OF CITIES

Illuminations bring joy to people and boost economic activity. At Leblanc illuminations, we understand that a collective effort is needed to reduce energy consumption. We offer solutions to make the holidays both magical and responsible.

A Supportive Approach to Sobriety

As a partner of local authorities and professionals, we advise our customers on how to reduce their energy consumption and costs. We have been using **LED technology** since 1996, and today, **100% of our decors** are equipped with LEDs, reducing the power consumption of illuminations by more than 90%.

Innovative Solutions to Optimize Consumption

To go further, in 2014 we developed **a remote control box** manufactured in France. Linked to an app, it allows decorations to be lit only during certain times of the day, offering **optimal control** and significant savings.

Local and Eco-Responsible Manufacturing

All our decorations are designed in-house, following **French expertise**, ensuring sustainability and environmental control. We prioritize recycling principles: **reducing** emissions and plastics, **reusing** raw materials, and **managing waste** in our workshops.

Better informing our customers

about the power consumption of our equipment is part of the service we provide, helping to guide your choices.

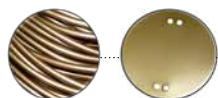

Quality and tranquillity

Our teams are constantly seeking eco-responsible solutions that will allow a reduction in plastic use and carbon footprint of our products, while improving their performance and sustainability.

Protection caps

Transparent protection caps

Ultra-flexible LED string lights, **30% brighter**, with an exceptionally long lifespan and low energy consumption (only 2.5 W per meter), and ultra-luminous rope light featuring horizontal 360° wide-projection LEDs.

Daytime decoration on both sides of the lighting decoration.

Our spangles and decorative mesh are made in France and 100% recyclable.

Set control solution

Plug & Light rapid electrical connection system

3D printing

Pre-pierced structures for fastening

Quality welding: cleaned and painted

e-deco by Leblanc

Innovative materials, optimised energy consumption, new production methods: we are transforming our business to offer you products suited to the demands of sustainable urban life.

50% electricity saving

thanks to the patented technology, developed by our teams, simply by controlling the illuminations' light-up time.

Hydro REDUXA Aluminium

This is an aluminium with a low environmental impact, produced using renewable energy. **100% of the aluminium** frames returned to us at the end of their lifecycle are repurposed into new decorations or products.

LEBLANC ILLUMINATIONS, FRENCH KNOW-HOW

From order to delivery

As a French Tech company, we are always proud to support jobs with manufacture in France, participate in the economic development of the country and export French know-how.

A well conceived project

Our creative and technical teams imagine the style and feasibility of your project while ensuring the scheme conforms with the necessary safety regulations, under the watchful eye of our in-house test centre.

100% made in Leblanc

Leblanc illuminations has the largest lighting decoration manufacturing factory. It brings together all the expertise required for **high-quality production.**

Logistics at your service

Shipments dispatched as quickly as possible. **Daily deliveries nationwide and internationally.** 20,000 m² of storage space.

Responsive quality and after-sales service

Systematic checks at every step of the process ensure quality service. Leblanc illuminations guarantee your **new products for 2 years.**

COMMUNITY & BEST PRACTICE

We are passionate about our work and aim to develop solid and responsible relationships with our partners.

Our good customer service and after sales care set us apart.

Taking care of our teams, our clients, and future generations

Leblanc Illuminations is committed to operating in a socially responsible manner. In 2020, we formalized our commitments and expectations in a Responsible Purchasing Charter, shared with our partners.

Commitment charters

We have developed a CSR Commitment Charter intended for our employees and stakeholders and a Responsible Purchasing Charter for our complete supply chain.

**Encouraging
recycling and
local purchasing**

**Annual client
satisfaction surveys**

PARTNERSHIPS

Feel the thrill of Ski Cross !

Already a partner of **French ski resorts, the French Ski Federation and the French Ski Cross Team since 2016**, we have renewed our partnership **until 2028** to experience even more sporting emotions!

megève

Leblanc as snow

We were looking for a place that embodied history, architectural heritage and **the French art of living**, nestled in the heart of the Alps. With its 445 km of slopes, hotels, typical chalets and shops, we have found it: Megève, an authentic and renowned Savoyard village.

Since 2017, Leblanc Illuminations has been proud to be the official partner of the Megève illuminations. Every year, more than **5,000 spectators** gather for the inauguration of the legendary tree on the church square.

Watch the video

Star Academy

Exceptional event!

Leblanc illuminations, in collaboration with **BS Technology**, has been lighting up the emblematic castle of Star Academy, the famous French singing competition show, for the past 2 years. Leblanc illuminations used lighting equipment from its **Chromex** brand.

Dammarie-les-Lys • France

CORPORATE SUPPORT & SPONSORSHIP

THE BLOUSES ROSES ASSOCIATION

The mission of The Blouses Roses, created in 1944, is to bring comfort, listen to and entertain people who are sick, elderly or disabled, by means of entertainment.

www.lesblousesroses.asso.fr

The magic of Christmas in the hospital!

The end-of-year celebrations reflect sharing and generosity. For nearly 15 years, to bring smiles to both young and old, Leblanc illuminations and Les Blouses Roses have been partnering together. Together, we bring hospitalized patients a Christmas full of lights by decorating their places of care.

Already, 49 hospitals are illuminated in the colors of Les Blouses Roses each year.

Meet Ubi

Here is Ubi, an adorable ball of fur in training to become **a legal assistance dog** thanks to the commitment of Sylvie Pigeard, Sales Assistant. Selected by Handi'Chiens, Ubi undergoes **16 months of training** to provide moral support to people who consider themselves victims of criminal offences. Its presence illuminates our offices, reminding us of the benefits of animals at work. **Thank you to Sylvie for her dedication!**

Leblanc illuminations is committed to its employees

In 2022, Leblanc illuminations created the "Leblanc Sponsoring" commission **to support the company's employees who are involved in sports and associative projects.**

The Lapland Trophy!

Behind this title were **Solène and Nadège**, two employees of Leblanc Illuminations who went to **Finland** for a 3-day **solidarity sports adventure** in extreme conditions: running, snowshoeing, icemad, cross-country skiing, and orienteering on magical snowy courses! We were extremely **proud of their performance.**

The Rallye Aïcha des Gazelles du Maroc

A women's car competition focused on navigation and orientation rather than speed, with the aim of crossing the Moroccan desert with the help of a compass and a topographic map, without GPS. It is therefore quite natural that the company wanted to accompany Audrey, our South-East/Corsica sales manager, in this great adventure.

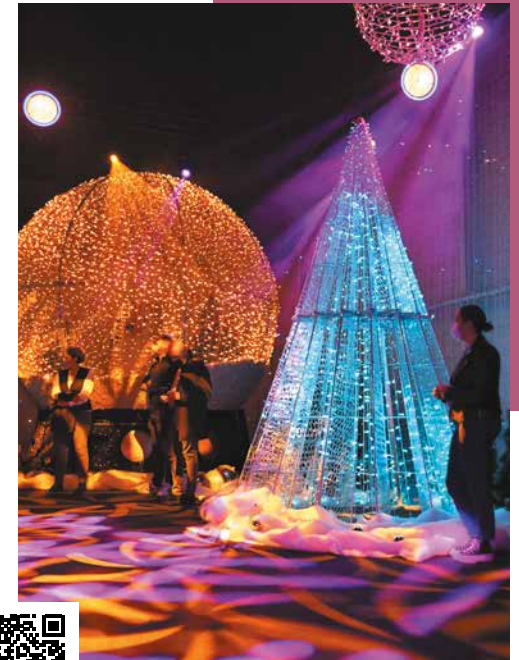

OUR SHOWROOM IN LE MANS

Awaken the senses with immersive experiences!

Leblanc illuminations presents an immersive light show in its showroom in Le Mans. Similar to the programs we offer to local authorities and businesses, the sound and light show transports the spectator into a magical universe that captivates both young and old!

PRESTIGIOUS DISPLAYS

A magical tree in Beaugrenelle Paris

Our expertise has brought to life a unique tree, which has become the center of attention in the gallery thanks to a combination of light and technological innovations. This project was carried out in partnership with **Mr. Bruno Dolis**, whose vision made it possible to design a magical universe within the gallery. We developed **automated shows** that punctuate the day, blending sounds, lights, and connected scenery to offer visitors an **immersive and unforgettable experience**.

Vivement Dimanche

For Christmas, we created the warm and **friendly atmosphere** of the **Vivement Dimanche television set**. Thanks to our installations, we added a touch of elegance and warmth, highlighting this iconic venue and providing viewers with a unique visual experience.

Watch the video

Cleveland Zoo • USA

Once again this year, we had the honor of lighting up the Cleveland Zoo for the Christmas holidays. Our light creations transformed the site into a **fairytale park**, offering a magical and unforgettable experience to visitors. We are proud to contribute to the magic of the holidays with our expertise.

Watch the video

Christmas magic at the Château de Vaux-le-Vicomte

Immerse yourself in the world of luminous tales.

This year, the Château de Vaux-le-Vicomte is transformed into an enchanted kingdom, where the tales of our childhood come to life under the lights. A unique scenography by **Leblanc illuminations / Twinkly Pro / BS Technology**, where innovation and heritage meet.

MEET YOU

Worldwide

Trade fairs and congresses

This year, many fairs and events facilitated enriching exchanges: the AMIF (Association of Mayors of Île-de-France) fair, the Congress of Mayors of Drôme, the SELAQ in Nouvelle-Aquitaine, in the Alpes-Maritimes, French Guiana, Martinique, and even as far as Croatia.

The Mayors and Local Authorities Exhibition, held annually in November in Paris, remains a must-attend event for local and regional stakeholders.

"The French Art of Living"

Our decorations shone during an **exhibition** in the magnificent salons of the Embassy of France in Austria. Organized by **Business France Österreich**, the event honored design, craftsmanship and innovation through a selection of exceptional French products.

Reports

Leblanc illuminations benefits from significant media visibility thanks to regular reports on prestigious French channels such as BFM Business and M6. This television exposure, along with coverage across the world — France, Austria, Guyana, Martinique, Croatia, and more — confirms its reputation in the field and highlights its commitment to excellence.

Watch the video

Quiet on set at Leblanc illuminations!

We welcomed a **film crew** from OpenMédias/BFM TV to our premises in Le Mans. Leblanc Illuminations was approached to be featured in an episode of the report series **"Entreprises d'avenir,"** available on **BFM's digital platforms.**

The team, consisting of a journalist and a videographer, captured footage in various areas of the factory and conducted a series of interviews.

The Great Clearance Sale!

We are proud to have participated in the Capital report on M6, a French TV channel. This report highlights our Great Clearance Sale Chromex Leblanc Illuminations, a key moment of the year.

Don't miss this opportunity to go behind the scenes and relive the highlights of this unique event.

Megève • France

MEGÈVE, WHERE
LEBLANC SHINES LIKE SNOW

Megève • France

Megève • France

It's with pride that,

since 2017, Leblanc illuminations has been the official partner of Megève's Christmas illuminations. Every year, over 5,000 people gather to witness the inauguration of the legendary Christmas tree in the church square. This year, once again, Leblanc Illuminations contributes to the magic of Christmas with its illuminated tree, a central element of a spectacular sound and light show.

Once upon a time, there was the magic of Christmas in Laval...

Immerse yourself in a subtle blend of imaginary tales and the traditional Christmas of our childhood. During your walk, let yourself be guided by the candles hanging along the illuminated path. Adorned with garlands, gold and red baubles, and twinkling lights, the Aristide Briand Bridge will transport you into a true Christmas tale. The gingerbread castle, floating on the water, will evoke fairytale stories such as Hansel and Gretel, Cinderella, or The Nutcracker.

CHRISTMAS & DELICACIES

Béziers • France

In the city of Béziers,

the delicacies attract all the locals, with an enormous gingerbread house decorated with colorful, vibrant candies. For Christmas, the town square is illuminated and filled with the scent of sweets. Children rush towards large, beautiful lollipops, as bright as they are tempting. Everyone realizes that the magic of Christmas lies in sharing and the joy of celebrating together, bringing warmth and happiness.

010011

- 1 bipolar plug + earth
- 30 mA circuit breaker
- 10 A fuse holder
- 1 earth terminal

ENERGY SAVER

REFERENCE	DESCRIPTION
010014	Energy saver

010014

- Enables stopping and restarting the illuminations in predefined periods : 7h stop after power, reset 6h (steady) after stopping.
- Automatic disconnection, automatic reset (guide UTE NF C17-210).
- 10 A - 2300 W - 300 mA.
- This product is designed to be mounted directly on plexo box sets, by yourself or in our factory.

IP54 ANIMATION CONTROLLERS

ANIMATION CONTROLLERS

REFERENCE	DESCRIPTION
105000	Flasher 1 x 5 A - Flasher with adjustable frequency
205000	Flasher 2 x 5 A - Flasher with adjustable frequency

TWINKLY PRO RANGE

twinkly™ PRO

Discover
breathtaking
animations

This is a major innovation in the lighting industry.

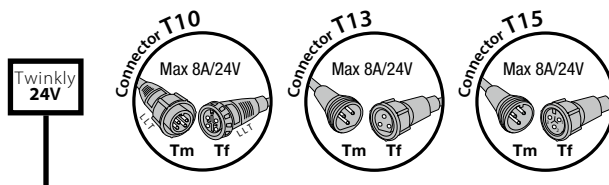

100% LED and point-to-point controllable,
Twinkly Pro represents the most significant technological advancement in the lighting decoration market in recent years.
Leblanc Illuminations is a distributor of Twinkly Pro controllable lights across Europe, the USA, and worldwide.

Easily find all the products in the Twinkly Pro range thanks to this pictogram.

There are 4 different types of Twinkly Pro connectors:

- T10 connectors plug together (24V).
- T13 connectors plug together (24V).
- T15 connectors plug together (24V).

Find out more about Twinkly Pro controllers and connectors on the following pages.

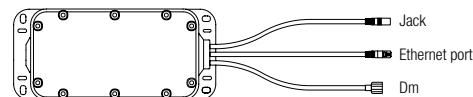

MODULE TWINKLY PRO MUSIC

24V

DC

REFERENCE	DESCRIPTION	CABLE
550965	Twinkly Pro Music Player	—

This new module will enable you to take the customization of your animations even further.

Use it to synchronize your video with your music on your Twinkly project.

In Saint Jean de Luz, Santa Claus honors the Basque Country and goes in search of the colors of Christmas

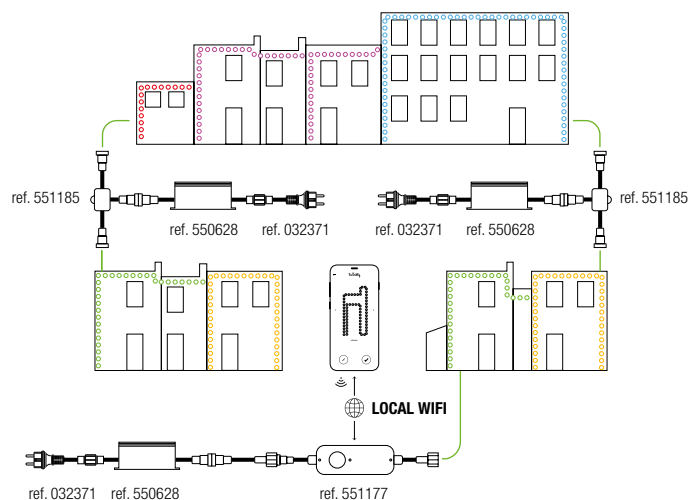

SPI TECHNOLOGY

Achieve the most spectacular shows with the new Twinkly SPI technology.

With SPI technology, you can install an unlimited number of Twinkly lighting products without having to multiply the controllers.

 SPI	ETHERNET	WIFI
CONNECTIVITY	Ethernet	Bluetooth & WiFi
NB OF PORTS	2	1
NB MAX OF LED	2 000 LED max	Depending on the nb of products
MAX POWER	150 W max	48W max
INDEX OF PROTECTION	IP65	IP44

Example of cabling plan with ref. 551177:

PLC TECHNOLOGY

The new generation of Twinkly LED string lights can be controlled point by point.

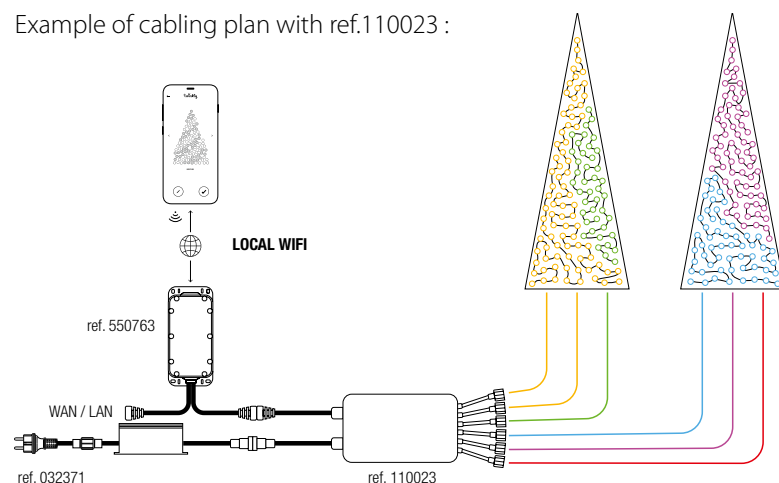

Thanks to its built-in Wi-Fi, you can access an infinite number of fully customizable effects.

Ref. 110023 : Allows you to connect up to 1,500 LEDs.

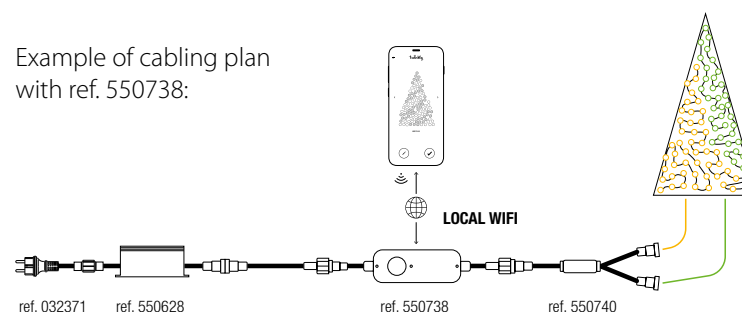

Ref. 550738 : Allows you to connect up to 500 LEDs, using the connector ref. 550740.

LUMINOUS GARLANDS

The majority of our products are available in both 230V and SELV*.

All our 230V products are rubber-wired to ensure optimal insulation.
All our 24V products are wired with durable PVC (except for the 24V Titan range, which is rubber-wired).

All our products feature 100% LED technology.

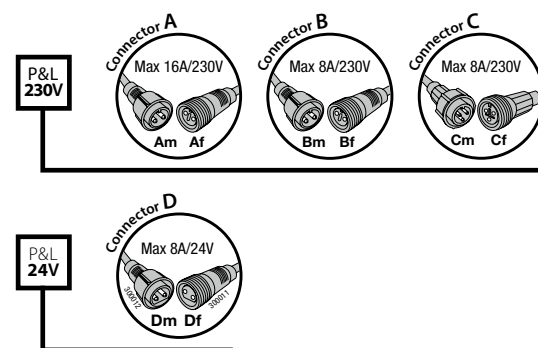

For all glittering products, one LED in every five shines with a white glitter effect. For Confetti products, each LED gradually and randomly changes color.

* SELV: Safety Extra Low Voltage, lower than 50V.

There are 4 different types of connectors Plug & Light:

- A connectors plug together (230V).
- B connectors plug together (230V).
- C connectors plug together (230V).
- D connectors plug together (24V).

For all our products, the specified dimensions do not include connectors.

Optima Range

With its IP67 rating, the Optima range is highly reliable.

Built without a rectifier, the Optima range requires less plastic in its manufacture: One ton of plastic is saved in its design.

Optima also uses approximately 20% less energy, saving four tonnes of CO₂.

It requires a non-rectified power cable (ref. 550734 or 550735).

This pictogram makes it easy to identify all the products in the Optima range.

MicroLED range, 3 times brighter.

All our products are made with 100% LED. For all glittering microLED products, every fourth LED is animated. current.

We advise you to connect microLED products **in parallel rather than in series**, to maximize their extendability. By default, it is the serial value that is noted in the tables.

REMOTE-CONTROLLED RGB GARLANDS & ROPE LIGHTS

Change the color or animation as you wish with a simple remote control.

Choose your color and pre-programmed animation: glittering, steady, or automatic color change.

A controller is required before installation to control the garland or rope lights. One remote control can manage all the decorations up to 10 meters.

Consult us for the implementation
of your projects.

LIGHT BULBS

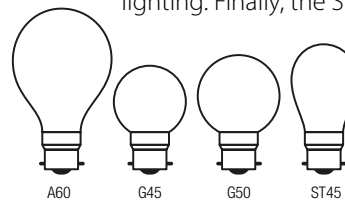

What are the differences between E27 and B22 bulbs?

E27 and B22 bulbs differ in their base type. The E27, with its 27 mm screw base, is the most commonly used model. The B22, on the other hand, has a 22 mm bayonet base.

What are the differences between A60, G45, G50 and ST45 bulbs?

These bulbs differ in size and shape. The A60, with its 60mm diameter, adopts a classic pear-shaped silhouette, ideal for Java or Javanaise-style garlands. The more compact G45 (45mm) has a globe shape, ideal for garlands or light displays. The G50, with a diameter of 50mm, offers a slightly larger globe shape, ideal for decorative and vintage lighting. Finally, the ST45, also 45mm in diameter, adopts an elongated Edison-type shape, perfect for warm, designer lighting.

All our bulbs are 100% LED.

What is an optimised bulb?

Our optimised bulbs are designed to maximize energy efficiency while guaranteeing outstanding visual performance.

They combine energy savings, durability and respect for the environment, without compromising on luminosity.

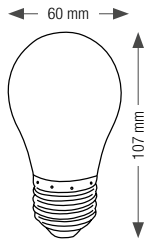

OPTIMISED E27 BULBS A60 WARM COLORS

REFERENCE	DESCRIPTION	CAP	DIAM.	NB LED	GLOBE	P. / 230 V
551079*	5 bulbs	E27	60 mm	5		2.5 W

PLUG & LIGHT

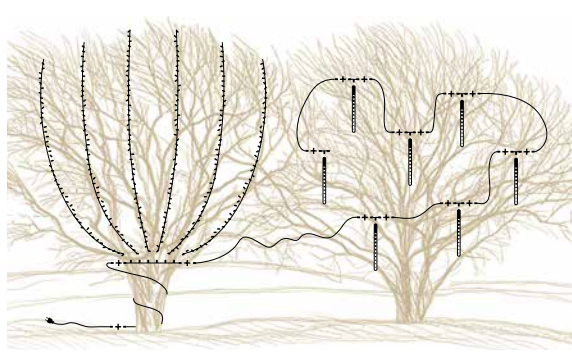

Plug & Light modularity

All our ranges of luminous decorations can be interconnected using Plug & Light technology. Mix and match products, colors, and animations to your liking.

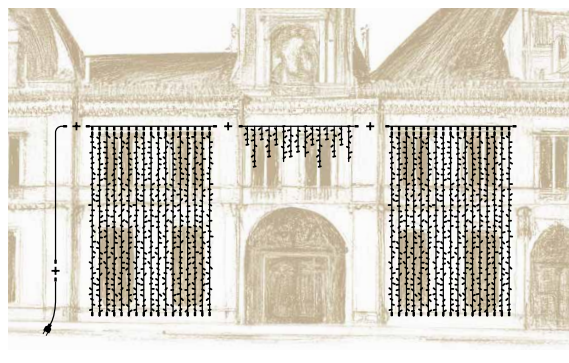

Contact us for personalized support.

DECORATING TREES

Whether you prefer 'Champagne glass style' or 'snowfall' installation, you can easily install your light strings and hanging lights with our **extensions** and **collectors**.

CLADDING A FACADE

Adapt your decoration to the architecture of your building by alternating **extension cords**, curtains and icicle lights according to your needs, all powered by a single **electrical supply**.

INSTALL AN ACROSS-THE-STREET DISPLAY

Use our **T-connectors** to insert decorations between your strings lights. Let your imagination run wild!

How to choose between 230V and 24V?

230V PLUG & LIGHT

These products are designed to be **interconnectable and extendable**, making wiring easier and minimizing voltage drop with their 230V operation. Installation is straightforward, but it is essential for public installations to be equipped with **30mA circuit breakers** for safety. These products can be interconnected over distances of up to 100m, as long as the total power does not exceed the maximum capacity of the power cable.

24V PLUG & LIGHT

These products can be **interconnected and extended**. Powered by transformers, they operate on safety extra-low voltage (SELV ≤50V). They offer **enhanced safety for the public**, are **discreet** (transparent PVC cable), and suitable for international use. However, their wiring, whether in series or parallel, can prove more complex, requiring precise calculation of total power to choose the right transformer.

Plug & Light 24V: what makes it special?

To connect your P&L 24V decorations safely, please follow these steps :

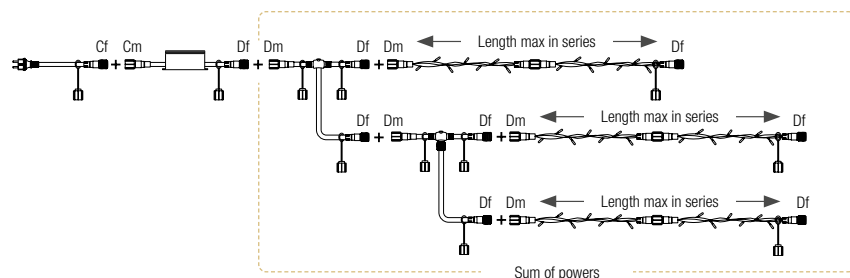

STEP 1 . Identify the lighting decorations you wish to use for your project.

STEP 2 . Check and carefully follow the maximum recommended length for each type of decoration.

STEP 3 . Add up the wattages of all selected decorations to determine the total wattage. Then use a suitable transformer

EXAMPLE OF **SERIES** AND **PARALLEL** WIRING

Decorate your storefront by combining P&L 24V and P&L 230V.

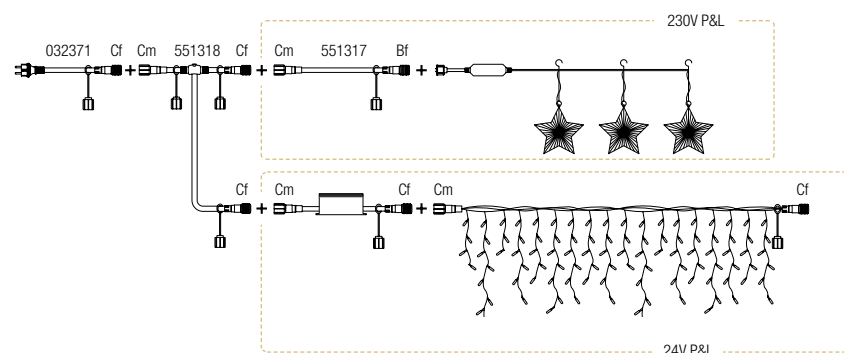

It's perfectly possible to combine 24V Plug & Light decorations with 230V ones.

For example, you can dress up a shop window with 24V microLED garlands, whose discreet power cable guarantees aesthetic installation, while using a 230V light decoration to dress up a Christmas tree.

These elements complement each other to create a magical atmosphere and draw visitors into a magical Christmas setting!

NATURAL CHRISTMAS TREES

Choose a tailor-made giant natural Christmas tree and support European Christmas tree growers.

This innovative metal structure brings together lots of standard-sized natural fir trees, to form an impressive festive centrepiece. Validated by technical consultants, the resulting structure stands up to the most extreme weather conditions and can be safely installed in a public place.

The spruce or Nordmann fir Christmas trees used to form this giant tree, have been grown in special forests in France. The giant tree can be created in your desired height and includes full installation kit: metal structure, Christmas trees, ballast and bracing kit, screws and assembly drawing.

TECHNOLOGICAL ANIMATIONS

Try an immersive enhanced-reality experience in the town or city-centre!

Visitors can interact with the illuminations and their environment. Create traffic and energize the city center!

Loomie is a seasonal augmented reality app for smartphones (Android and IOS), downloadable from App Store and Play Store. It works within a specific area, defined for your event. Thanks to a QR code sign (provided by Leblanc illuminations), visitors are invited to download the app to access a variety of interactive 3D games to play within the heart of your city.

Discover Loomie

**The aim of this app:
create a buzz about your
place, while inviting visitors
to share pictures featuring your logo to their
friends and family!**

Thanks to its simplicity and in-built shareability, the app encourages social sharing featuring your logo, via the internet and social networks (facebook, instagram, snapchat, etc...).

Download Loomie

5 applications

This is primary function of the application. Also available at the end of each game, it allows you to create personalised digital greeting cards in a matter of seconds.

Father Leon hires Detective Rudolph to go in search of the objects that make the Christmas Spirit. A real treasure hunt in your city!

The wind scattered Pigloo's clothes while he was taking his bath. In this game, the user must find them by scanning the environment with the screen.

In this race against the clock, you have to help Father Leon catch a maximum of gifts that have fallen from the sky by moving him around the screen.

Even more visibility and traffic! This function sends the user directly to your website.

A turnkey offer including:

- 1 Freestanding totem pole ref. 300006.
- 3 games for young and old: Pigloo, the chilly penguin, Father Leon, the gift catcher and Detective Rudolph - Let's save Christmas!
- Personalization of the digital greeting cards with your logo, as well as 8 fun photo filters.
- redirection link to your website.
- The different graphic elements in your city's promotional materials.

REMOTE CONTROL SOLUTION OF YOUR ILLUMINATIONS

Technology designed to
save energy.

Nearly **50%**
energy saving
with our patented solution!

I can programme my illuminations and their
turned on/off period and hours, zone by zone,
with a few clics on my tablet or smartphone.

It's so easy. I don't need any extra power supply
cable.

Indeed, with the Saver Box installed on Leblanc
illuminations products, I simply **download the App**
and let myself be led.

Further information
on our remote control solution

REMOTE CONTROL SOLUTION OF YOUR ILLUMINATIONS

Simple and intuitive

- Intuitive app
- Wireless communication (Bluetooth / 868 MHz)
- One power cut period and 4 exceptions
- Memorising of programmes guaranteed even switched off
- Super-easy installation thanks to the Plug & Light connectors

PASS BOX ⁽¹⁾

KOLORMAX BAR

IP67

REFERENCE	DESIGNATION	LAMP	DIMENSIONS	WEIGHT P. / 230V	OPTICS	C. DMX
180237*	Kolormax BAR 9	RGBL 9 LED	305 x 66 x 61 mm	1.2 kg 30 W	15° to 60°	1/3/4/5/6/7
180238*	Kolormax BAR 18	RGBL 18 LED	610 x 66 x 61 mm	2.2 kg 60 W	15° to 60°	1/3/4/5/6/7/11
180239*	Kolormax BAR 27	RGBL 27 LED	915 x 66 x 61 mm	3.3 kg 90 W	15° to 60°	1/3/4/5/6/7/15

The Kolormax range is a new generation of linear wall washers. The BAR series exists in 3 versions, with 9, 18, or 27 LEDs. The IP67 Bars are designed as a flexible solution to highlight a wide variety of outdoor building structures.

The Kolormax Bars are equipped with the RDM function and can be controlled by sections (Bar 9 – 1 section, Bar 18 – 2 sections, Bar 27 – 3 sections). Each section requires 1 filter (for example: 1 filter for Bar 9, 2 filters for Bar 18, and 3 filters for Bar 27).

- 9, 18 ou 27 LEDs multichip RGBL
- Beam angle 15° to 60°
(15°, 30°, 45°, 60°, 15°x30° et 15°x60°)
- RDM
- IP67

SPO 15

NEWTON 210 HD+

IP66

REFERENCE	DESIGNATION	LAMP	DIMENSIONS	WEIGHT P. / 230V	OPTICS	C. DMX
180063	Newton 210 HD+	RGBAL LED	668 x 344 x 273 mm	16 kg 250 W	15° > 30°	8/10/13/19

The Newton 210 HD+ is an IP66 profile projector equipped with a 250W RGBA + Lime LED and a medium-sized gobo holder (water effect gobo included). The light features 12 white macros, ranging from 2700° to 8000°, as well as Lee and Rosco color presets. The light body is made of die-cast aluminum and is resistant to temperatures from -20°C to +45°C.

- IP66 profile
- Zoom 15 to 30°
- Motorized zoom focus
- 4 manual shutters
- Medium size indexable rotating gobo
- Water effect gobo included
- Wireless DMX by Wireless Solution
- RDM
- Illuminance 4662 Lux at 5m in 15°

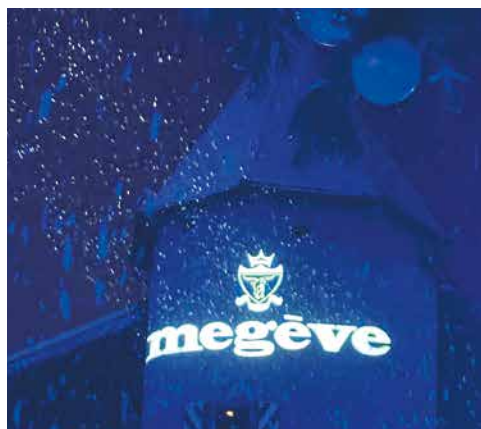

Watch the animations

KEPLER 350

The Kepler 350 is an IP66 gobo projector equipped with a 350W white LED at 7000°—perfect for outdoor projection. Thanks to its various gobo effects, CMY, prism, frost, and an 8° to 40° zoom, the spotlight delivers impressive short and long-distance projections. With an IP66 waterproof rating, the product is ideal for use in theme parks, shopping centers, architectural buildings, historical monuments, and more.

- 350W white LED
- Zoom 8 to 40°
- Power 380W
- 7 rotating gobos + white wheel
- 7 colors + white wheel
- CMY
- Animation wheel
- 3 facets prism
- Frost
- Wireless Solution
- RDM
- IP66

The latest addition to the range, the Kepler 150, is an IP66 gobo projector equipped with a 100W 5900K white LED engine, delivering a flux of 2850 lumens. Housed in a compact case, it includes a 5-color wheel, a 4-rotating-gobo wheel, a 4-facet prism, an animation wheel, and an 18° to 40° zoom. The Kepler 150 can project images onto buildings or any other outdoor surface at short or medium distances. It is also equipped with a wireless DMX receiver, eliminating the need for a control cable.

FLOODLITE

This projector packs an RGBW COB LED into its compact size, surprising you with its 200W power and 60° beam angle.

Its weight and size make it easy to conceal.

IP65

REFERENCE	DESIGNATION	LAMP	DIMENSIONS	WEIGHT P. / 230V	OPTICS	C. DMX
180108	Floodlite HD	RGB 1 LED 200 W	235 x 110 x 190 mm	3 kg	120 W 60°	4/7/10/11/15

E-BOARD

This box allows you to animate all your events and lighting decorations.

Available in 512 or 1024 DMX channels, it lets you recall your recorded scenes using the buttons on the front panel.

IP20

REFERENCE	DESIGNATION	DIMENSIONS	WEIGHT	C. DMX
180163	E-Board 1024 MKII	127 x 110 x 40 mm	0.18 kg	2 x 512
180034	E-Board 512	97 x 166 x 38 mm	0.18 kg	1 x 512

Facilitate your installations by removing cables, opt for wireless DMX!

These boxes can support 512 to 1024 DMX channels, and can be used as DMX transmitters, receivers or repeaters, all IP65.

CRMX

CRMX Outdoor FX is the ultimate wireless DMX and RDM product for any installation.

CRMX OUTDOOR FX - 412321

- DMX512 and RDM support
- Power over Ethernet support
- Ethernet or wired DMX input/output
- Up to 1000 meter link range
- 5 ms latency
- Automated Cognitive Coexistence
- Forward Error Correction
- IP67 classification
- Vandal proof casing

CRMX Outdoor RX is an IP67 outdoor receiver for one DMX universe being transmitted by a CRMX transmitter (indoor or outdoor).

CRMX OUTDOOR RX - 412323

- One universe supported
- DMX512 and RDM support
- Up to 1000 meter link range
- 5 ms latency
- Automated Cognitive Coexistence
- Forward Error Correction

GALILEO RX - 412329

Supported Protocols:

- DMX / RDM
- CRMX², CRMX Classic
- W-DMX G3/G4/G4S/G5
- Bluetooth 5.0

GALILEO

Galileo makes your next installation project easier than ever by providing reliable Wireless DMX in an install friendly form factor.

GALILEO TX - 412328

Supported Protocols:

- DMX / RDM
- CRMX Classic
- W-DMX G3/G4S
- Bluetooth 5.0

RF Characteristics:

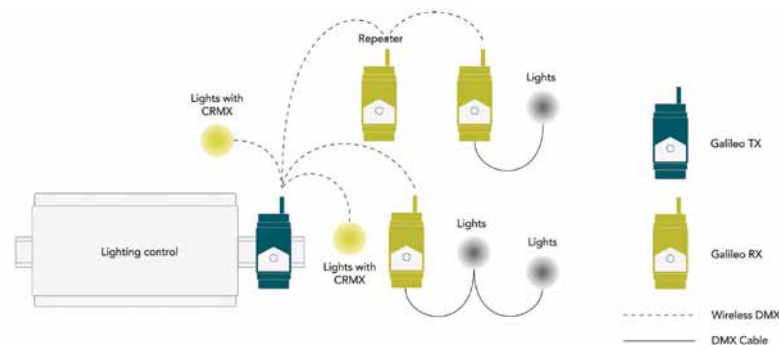

- 2402-2480 MHz frequency
- 7 - 280 mW output power
- 5ms latency
- 128-bit encryption
- Forward Error Correction

Physical:

- DIN-rail 2 module width
- RP-SMA antenna connector
- 12-24 VDC/VAC pluggable screw terminal
- DMX/RDM 3 pin pluggable screw terminal

Approvals :

- CE, FCC, IC, NRTL (MET), KC, MIC, UKCA

SERVICES

To support you in your projects, we offer a range of services.

From cable preparation to the installation start-up, everything will be done to guide you in the best possible way in the realization of your lighting

MEL-CABLAGE :

- Action carried out on a projector to match the product's connectors to the customer's project
- Address projector / Define static programme

MEL-PREPA :

- Project wiring plan
- Programming of a show defined with the customer
- Hotline with dedicated spotlighting contact person

MEL-ASSIST :

- On-site travel
- Project wiring plan
- Programming a show defined with the customer
- Helpline with dedicated contact person for spotlighting
- Adjusting spotlights and checking installation
- Validation of product operation

MEL-FORMA :

- On-site training 4 people maximum per course
- Training in projector use
- Pilot software training
- Various training courses

MEL-SCAN :

- On-site travel
- Measuring buildings
- Supply of data files

MEL-TWINKLY :

- On-site travel
- Project study
- Project wiring diagram
- Set-up of decorations/products and verification of installation
- Validation of product operation
- On-the-spot training in the use and control of Twinkly PRO technology

Our high-performance scanner enables precise 3D surveying of complex objects and buildings.

This automated dimensioning system is an invaluable asset, as it allows all necessary measurements to be taken in record time and integrates this data into the simulation of your lighting project. You can also retrieve neutral files from a simple and intuitive interface, compatible with any operating system, for all your future needs

Sound & lighting

Thanks to our project managers specialized in creating sound and light shows, your installations (Christmas trees, ceilings, etc.) come to life during events.

Sound and light shows tell a story, whether imaginary or historical. Depending on the location and the atmosphere you wish to create, we can offer solutions tailored to your needs. A light show can be installed in a place rich in history: a historic building, a facade, an avenue... In this way, you can highlight your heritage and reveal details that might otherwise go unnoticed! Spectators are captivated, and it's up to you to fill them with even more wonder: light, sound, fragrance... Programmed scenes or sensor-triggered – anything is possible to accompany your story.

Technical Appendix

COMPLIANCE OF OUR PRODUCTS

All Leblanc illuminations’ products comply with all European standards and directives. The product compliance certificates are provided on request.

DIRECTIVE NAME	AREA OF APPLICATION
 2011/65/UE Directive	The ROHS European directive aims to restrict the use of 6 dangerous substances (lead, mercury, cadmium, hexavalent chrome, polybrominated biphenyls (PBBs), and polybrominated diphenyl ethers (PBDEs). RoHS signifies 'Restriction of the use of certain Hazardous Substances' in electrical and electronic equipment.
 2012/19/UE Directives	Waste Electronic and Electrical Equipment (WEEE) is a category of waste defined by European regulations as 'equipment functioning with electric currents or electromagnetic fields, as well as equipment which produces, transfers, and measures these currents and fields, designed to be used at a voltage which does not exceed 1000 volts AC and 1500 volts DC'. In Europe, this directive aims to make the recycling of WEEE mandatory and establish the principle of producers' responsibility. Consumers will contribute to this process by paying an eco-contribution or eco-tax, included in the purchase price for new equipment.

INTERNATIONAL PROTECTION

IP is the protection index against solids and liquids. Outside, the minimum protection index is IP44.

1st protection figure = SOLIDS

2nd protection figure = LIQUIDS

IP	PROTECTION
0	No protection.
1	Protected against solids of more than 50 mm (unintentional contact with hands).
2	Protected against solids of more than 12.5 mm (fingers).
3	Protected against solids of more than 2.5 mm (tools, screws).
4	Protected against solids of more than 1 mm (small tools, small wires).
5	Protected against dust (no harmful deposits).
6	Fully protected against dust.

IP	PROTECTION
0	No protection.
1	Protected against drops of water falling vertically (condensation).
2	Protected against drops of water up to 15° from vertical.
3	Protected against rainwater up to 60° from vertical.
4	Protected against water spray from all directions.
5	Protected against hosed water from all directions.
6	Fully protected against water spray similar to waves.
7	Protected against the effects of immersion.
8	Protected against the effects of prolonged immersion in the specified conditions (followed by an indication of the maximum immersion depth in metres).

PUBLIC ACCESSIBILITY TO 230V DECORATIONS

Installations which are accessible to the public

They are located at a height lower than 3 m above the ground or at least 1 m horizontally outwards from a balcony, terrace or any place accessible to the public. Light installations positioned directly on the ground are also included.

What precautions need to be taken?

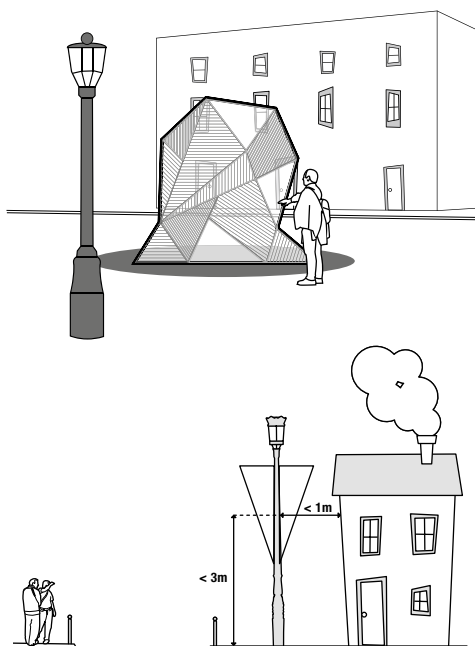

- Extract from the standard C 17-202, § 5.1.2

'The circuits must be protected at their source by high sensitivity residual current devices (30mA) for additional protection against direct contact.'

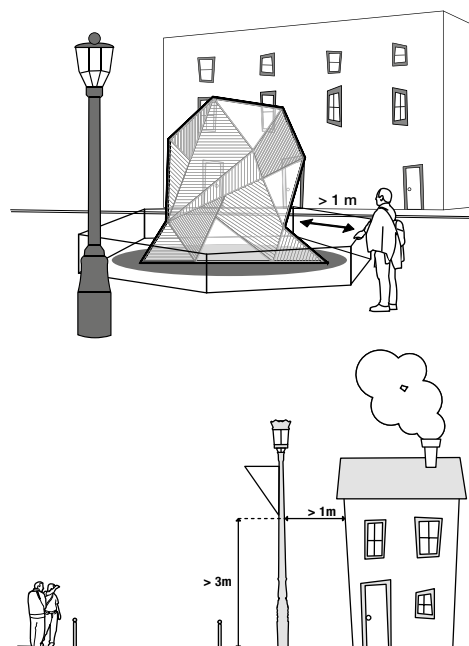

- Extract from the standard C 17-202, § 5.2.2

'Maintained inaccessibility provides protection against direct contact. In terms of indirect contact, the circuits must be protected by a medium sensitivity residual current device (300mA). The connection must be made with fixed connections. Non-fixed connections and even inaccessible sockets are protected by high sensitivity residual current devices (30mA). If part of the temporary installation does not comply with inaccessibility regulations, the requirements of 5.1.2 must be applied at least to the part in question.'

INSTALLATIONS ACCESSIBLE TO THE PUBLIC

INSTALLATIONS NOT ACCESSIBLE TO THE PUBLIC

TECHNICAL VOCABULARY

AMPERE (A)

Unit which measures the intensity of current which corresponds to the number of electrons which pass through a point in a circuit per second.

VOLT (V)

Unit which measures the voltage. The voltage is the difference in electrostatic potential between two points and is associated with the energy that an electron needs to move between these two points.

WATT (W)

Unit which measures the power consumed by a product.

Calculation of the intensity of the current : $P = U \times I$

(P : power in W, U : voltage in V, I : intensity in A)

FREQUENCY (Hz)

Number of times the polarity of the signal changes per second. It is given in Hertz.

COLOUR TEMPERATURE

The colour temperature makes it possible to determine the colour of a light source. The apparent colour of a light source varies from the orange-red of a candle flame (1850 K) to the blueish colour of an electronic flash (between 5000 and 6500 K according to the manufacturer). It is measured in Kelvin (K).

- Warm white: 2600 K
- Neutral white: 3500 K
- Cool white: 4500 K

CE MARKINGS

It is mandatory for all products covered by one or several European directives which specifically provide for it. To put CE marking on a product, the manufacturer must carry out, or have carried out, checks and tests to ensure that a product complies with the essential requirements, particularly in terms of health and safety, defined in the directive(s) concerned. It is not a certification mark or an indication of the geographical origin of the product. It is mandatory and of a regulatory nature and is the visible commitment of the manufacturer that its product complies with European legislation. It gives the products concerned the right of free movement throughout the European Union.

PROCESSING OF ELECTRIC AND ELECTRONIC PRODUCTS' END-OF-LIFE

Applied to all products except incandescent bulbs, gas bulbs, spotlights, power cables and all non-electric products

LEAKAGE CURRENT

The leakage current is current which, by definition, leaks between the active parts and the grounding connection in the absence of an electrical fault. It is part of the installation's normal functioning. The design of an electric installation must provide for residual current protection to ensure the safety of persons and goods by taking these leakages into account. These, along with the installation's upstream cables, can reach the threshold value for activating the protection. The solution is to limit the number of devices protected by the same residual current device.

For example, for 10 m of garlands, you measure leakage current equal to 0.09 mA. Knowing that a 30 mA circuit breaker is triggered at 16 mA, you need to heed to a maximum of 50 x 20 m garlands for an HPI type 30 mA differential circuit breaker.

DMX PROJECTION AND MANAGEMENT

DIAMETER PROJECTION TABLE

You can choose the projector suited to your project according to the minimum projection angle to illuminate a building from a given distance.

PROJECTION DISTANCE (IN METRES)

BEAM ANGLE (IN DEGREES)	PROJECTION DISTANCE (IN METRES)

DMX: DIGITAL MULTIPLEXING

The DMX is a protocol which came out of the USA and was introduced in 1986. It is a copyright-free system and it is cheap to implement. The DMX protocol is a switchboard for transmitting information between controls and remote receivers. Everything is based on digital pulse trains made up of square waves transmitted cylindrically on a frequency of 250 kHz. 24 to 512 channels can be transmitted on the same frame, with 512 possible Start codes.

Precautions:

- It has low voltage, so you need to avoid being close to high-emission high voltage.
- The voltage compared to the mass = - 7V to + 12V.
- The current between 2 conductors must be min. 200 mV.
- Y connections are strictly prohibited. You must use an amp junction box.
- The signal must be re-amplified approx. every 200 m or every 20 products.

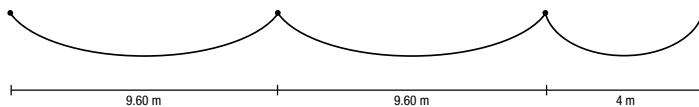

INSTALLING A CEILING LIGHT

EXAMPLE: to fit a 100 m long x 4 m wide street with an led ceiling light

CALCULATE THE MINIMUM NUMBER OF ATTACHMENT POINTS

$$\frac{100}{9.6} = 10.41$$

Length of street

You need 12 attachment points (or ropes):
10 spaces of 9.6 m + 11th space of 4 m

CALCULATE THE NUMBER OF CONNECTORS ACROSS (REF.058919)

$$\frac{4}{1} = 4$$

Width of street

Length of connector

You need 4 connectors width-wise.

CALCULATE THE TOTAL NUMBER OF 20 M GARLANDS

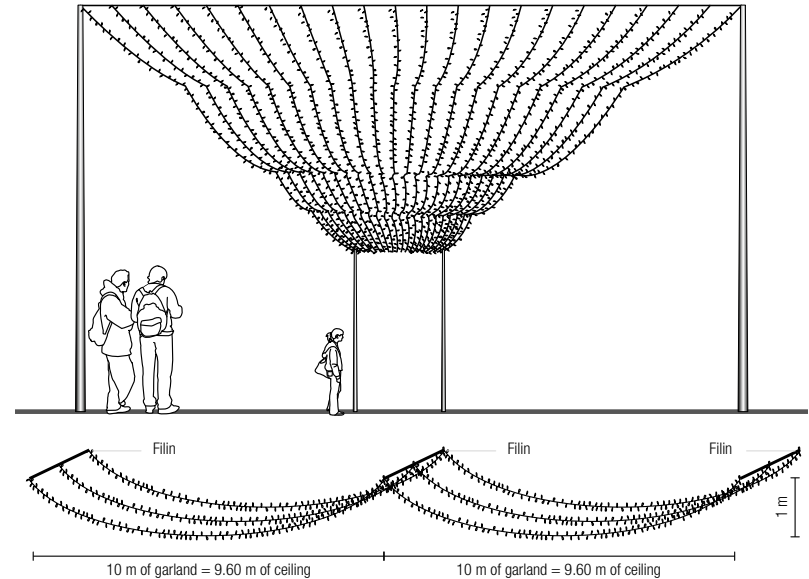

Given that you need 4 connector cables width-wise and that each connector has 4 connection points, there will be 16 garland outlets (4x4 = 16).

We also have 10 spaces of 9.6 m (knowing that you need 10 m of garland to cover 9.6 m of ceiling) + 1 space of 4 m (that we could cover with 5 m of garland).

For each of the 16 lengths, you will need 5 x 20 m garlands + 1 x 5 m garland:

- 16 outlets of 5 x 20 m garlands = 16 x 5 = 80 x 20 m garlands.
- 16 additions of 5 m = $\frac{16 \times 5}{20} = 4 \times 20$ m garlands (dividable every 5 m).

To do this street's 'ceiling', you will therefore need 84 x 20 m garlands.

N.B.: For 10 m of garland, you can only cover 9.6 m of ceiling. You therefore need to have attachment points every 9.6 m or less.

CALCULATE THE NUMBER OF SUPPLIES (REF.550663 + 300002)

Given that a fixed LED garland uses 17W/230V, the total use for the ceiling will be:
84 x 17 = 1428W.

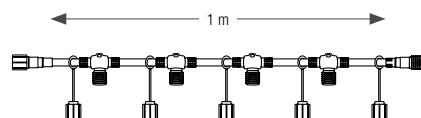

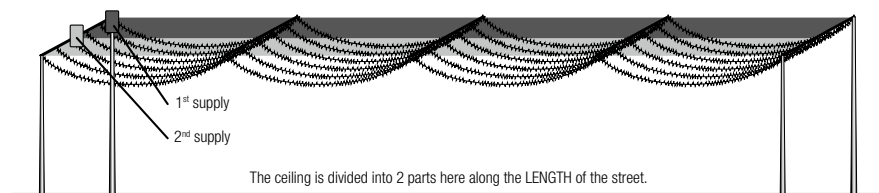

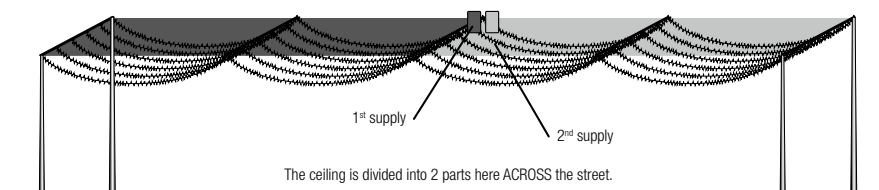

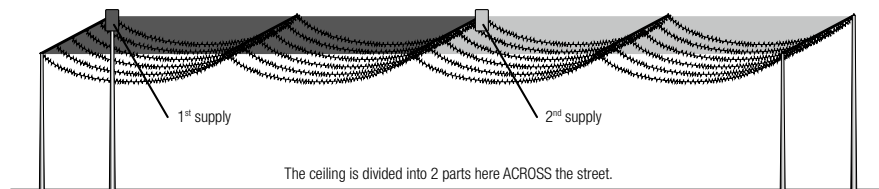

We are limited in terms of power here by the power cable, which can handle a maximum power of 920W/230V

(because of the 4A rectifier). So: $\frac{1428}{920} = 1,55$

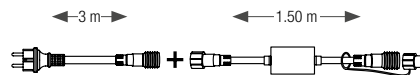

2 power cables are therefore required.

INSTALLING A CEILING LIGHT

Examples of cabling :

058919
2-wire connector cable for fixed LED garlands (see p.269)

550663 + 300002
Power cable + 4A rectifier (see p.268)

FITTING A TREE WITH LIGHTING GARLANDS

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times D$$

Perimeter in m = 3.14 Diameter in m

CALCULATE THE NUMBER OF GARLAND COILS (NC) (0.3 M BETWEEN EACH COIL)

$$NC = \frac{H}{0.3}$$

Number of coils

CALCULATE THE TOTAL LENGTH (TL) OF GARLANDS REQUIRED

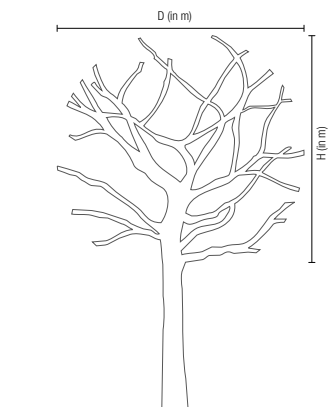

$$LT = \frac{NC \times P}{2}$$

Total length in m

CALCULATE THE NUMBER OF GARLANDS (NG) REQUIRED

$$NG = \frac{LT}{LG}$$

Number of garlands Length of garland used in m

EXAMPLE

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times 4.5 = 14.13 \text{ m}$$

CALCULATE THE NUMBER OF GARLAND COILS (NC) (0.3 M BETWEEN EACH COIL)

$$NC = \frac{6}{0.3} = 20$$

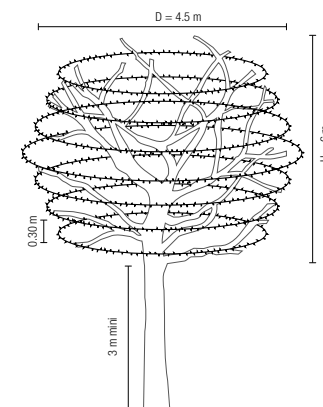

CALCULATE THE TOTAL LENGTH (TL) OF GARLANDS REQUIRED

$$TL = \frac{20 \times 14.13}{2} = 141.3 \text{ m}$$

CALCULATE THE NUMBER OF GARLANDS (NG) REQUIRED

$$NG = \frac{141.3}{20} = 7.065$$

or 8 garlands are therefore required, depending on the density desired

FITTING A FIR TREE WITH LIGHTING GARLANDS

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times D$$

Perimeter in m / $\pi = 3.14$ / Diameter in m

CALCULATE THE NUMBER OF GARLAND COILS (NC) (0.3 M BETWEEN EACH COIL)

$$NC = \frac{P}{0.3}$$

Number of coils

CALCULATE THE TOTAL LENGTH (TL) OF GARLANDS REQUIRED

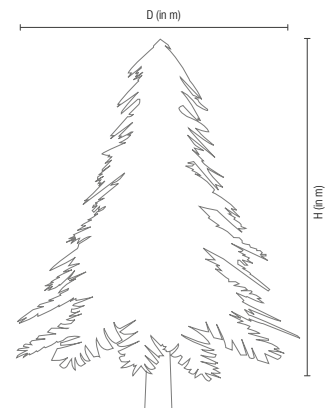

$$TL = \frac{NC \times P}{2}$$

Total length in m

CALCULATE THE NUMBER OF GARLANDS (NG) REQUIRED

$$NG = \frac{TL}{LG}$$

Number of garlands / Length of garland used in m

EXAMPLE

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times 3 = 9.42 \text{ m}$$

CALCULATE THE NUMBER OF GARLAND COILS (NC) (0.3 M BETWEEN EACH COIL)

$$NC = \frac{P}{0.3} = 26.66$$

CALCULATE THE TOTAL LENGTH (TL) OF GARLANDS REQUIRED

$$TL = \frac{NC \times P}{2} = 125.6 \text{ m}$$

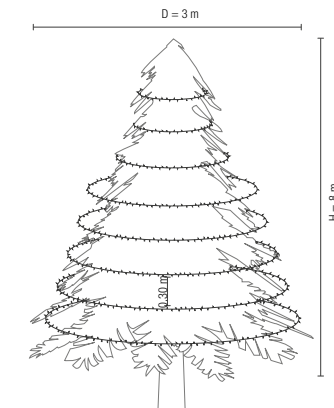

CALCULATE THE NUMBER OF GARLANDS (NG) REQUIRED

$$NG = \frac{TL}{20} = 6.28$$

garlands are therefore required to decorate this tree.

N.B.: Depending on requirements, you can reduce or increase the space between the garlands:

- dense tree: 0.15 m
- normal tree: 0.30 m
- light tree: 0.50 m

FITTING A TREE WITH B22 GARLANDS

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times D$$

Perimeter in m / $\pi = 3,14$ / Diameter in m

CALCULATE THE NUMBER OF GARLAND COILS (NC) (1 M BETWEEN EACH COIL)

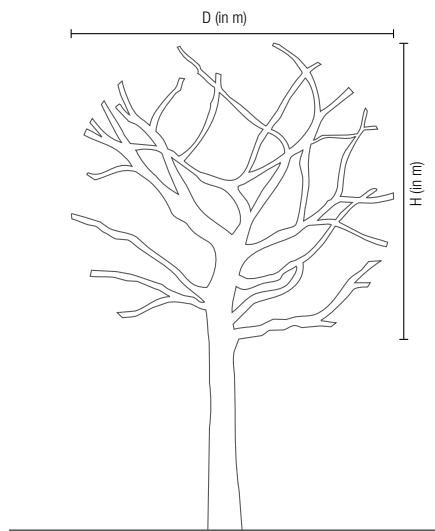

$$NC = \left(\frac{H}{1} \right) / 2$$

Number of coils

CALCULATE THE TOTAL LENGTH (TL) OF GARLANDS REQUIRED

$$TL = NC \times P$$

Total length in m

EXAMPLE

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times 5 = 15,7 \text{ m}$$

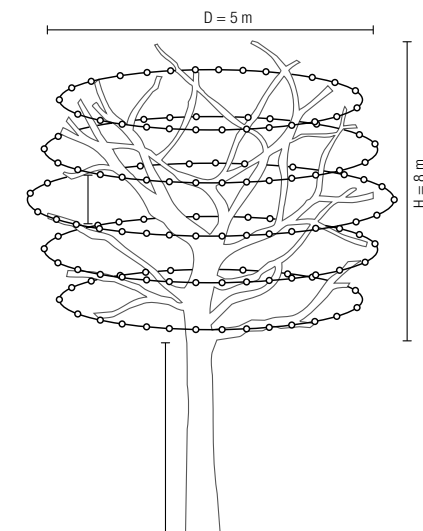

CALCULATE THE NUMBER OF GARLAND COILS (NC) (1 M BETWEEN EACH COIL)

$$NC = \frac{8}{2} = 4$$

CALCULATE THE TOTAL LENGTH (TL) OF GARLANDS REQUIRED

$$TL = 4 \times 15,7 = 62,8 \text{ m}$$

Depending on the density desired, take either a 50 m/140 socket garland or a 50 m/200 socket garland.

FITTING A FIR TREE WITH B22 GARLANDS

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times D$$

Perimeter in m / $\pi = 3.14$ / Diameter in m

CALCULATE THE NUMBER OF GARLANDS (NG) (2 M BETWEEN EACH DROP)

$$NG = \frac{P}{2}$$

Number of garlands

CALCULATE THE LENGTH (LG) OF A GARLAND DROP

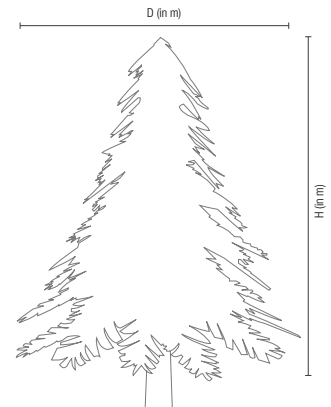

$$LG = \sqrt{H^2 + \left(\frac{D}{2}\right)^2}$$

Total length in m

CALCULATE THE TOTAL LENGTH (TL) REQUIRED

$$TL = LG \times NG$$

Total length in m

EXAMPLE

CALCULATE THE PERIMETER OF THE TREE

$$P = \pi \times 6 = 18.84 \text{ m}$$

CALCULATE THE NUMBER OF GARLANDS (NG)

$$NG = \frac{18.84}{2} = 9.42$$

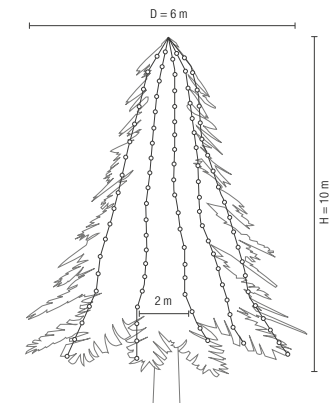

CALCULATE THE LENGTH (LG) OF A GARLAND DROP

$$LG = \sqrt{10^2 + \left(\frac{6}{2}\right)^2} = 10.44 \text{ m}$$

CALCULATE THE TOTAL LENGTH (TL) REQUIRED

$$TL = 10.44 \times 9.42 = 98.34 \text{ m}$$

➤ A 100 m B22 garland is therefore required.

Tivat • Montenegro

Decorations delivered with power cable and attachment kits, without bulb or satlight. All the luminous products in the catalogue are equipped with LEDs.

Eco-tax:

Due to changes in European directives and their interpretations, some of our products, which are not currently subject to this contribution, may be included in it during the year. The eco-tax scale may also change. The eco-tax is neither rebatable nor refundable.

Tax on light bulbs:

This tax applies to both professionals and individual customers. Leblanc illuminations is affiliated to Ecosystem for the management of light bulbs.

Tax on other electrical products :

The tax applies to retailers who sell to individual customers as well as professionals. However, it does not apply to professionals who take charge of recycling end-of-life products. The latter must send written confirmation to Leblanc Illuminations. For other electrical products, Leblanc Illuminations is affiliated to Ecologic and Corepile.
